Sub-processors and Third-Party Suppliers

OnSecurity — public summary of our record of processing

OnSecurity uses the third-party suppliers listed below to help deliver its services. For each supplier, the table shows which categories of personal data it may process on our behalf. If you have any questions about how we use sub-processors, please contact our privacy team via onsecurity.io.

Version 1.0 · Last updated 24 November 2026

Data categories

Client
Business contact and account details, such as business name and address, contact names, email addresses, phone numbers and contracts.

User
Platform user details: name, email address, phone number, job title and company, plus usage and tracking data such as IP address and browser.

Payment
Billing contact details and payment details.

Engagement
Scoping information, targets and test documentation, including access credentials supplied for testing.

Security findings
Vulnerability and security issue data from testing, including details of affected assets.
